Orphans and keep-with-next sample

Filler block 01. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-01.

Filler block 02. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-02.

Filler block 03. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-03.

Filler block 04. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-04.

Filler block 05. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-05.

Filler block 06. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-06.

Filler block 07. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-07.

Filler block 08. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-08.

Filler block 09. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-09.

Filler block 10. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-10.

Filler block 11. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-11.

Filler block 12. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-12.

Filler block 13. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-13.

Filler block 14. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-14.

Filler block 15. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-15.

Filler block 16. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-16.

Filler block 17. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-17.

Filler block 18. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-18.

Filler block 19. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-19.

Filler block 20. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-20.

Filler block 21. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-21.

Filler block 22. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where

phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-22.

Filler block 23. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-23.

Filler block 24. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-24.

Filler block 25. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-25.

Filler block 26. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-26.

Filler block 27. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-27.

Filler block 28. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-28.

Filler block 29. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-29.

Filler block 30. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-30.

Filler block 31. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-31.

Filler block 32. Approaching the natural page-break zone. Marker ORPHAN-FILL-32.

Short straddler candidate near the first page bottom. **ORPHAN-SHORT-STRADDLE** Two or three lines only so orphansWidows may lift the whole block.

Keep-with-next heading ORPHAN-HEADING-KEEP

Body immediately after the heading must not leave the heading stranded alone at the bottom. **ORPHAN-HEADING-BODY**

Continuation page

Forced continuation ensures a stable ≥2 page envelope. **ORPHAN-PAGE2-SHORT**

Trailing page-two prose. Marker ORPHAN-TRAIL-01.

Trailing page-two prose. Marker ORPHAN-TRAIL-02.

Trailing page-two prose. Marker ORPHAN-TRAIL-03.

Trailing page-two prose. Marker ORPHAN-TRAIL-04.

Trailing page-two prose. Marker ORPHAN-TRAIL-05.
