

Implemented CSS audit A

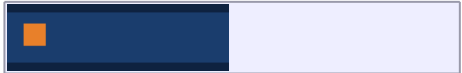

Slice A · 118 Implemented properties · font-family "Liberation Sans" · local images

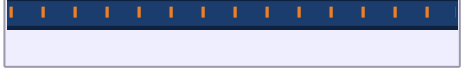

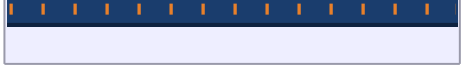

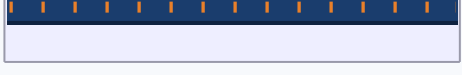

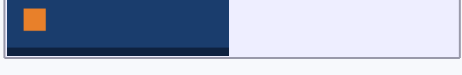

IMPLEMENTED-PROPS-A

Each row names an Implemented property, explains the expected effect in plain words, and applies that property in the Effect cell so print output can be checked by eye. Generate with `--font-path testdata/fonts/implemented-audit`.

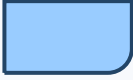

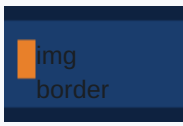

#	Property	What it should do	Effect (live)
1	<code>-webkit-align-content</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>`align-content`</code> . Should resolve like the unprefixed property. The alignment in Effect should position items as specified.	1234
2	<code>-webkit-align-items</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>`align-items`</code> . Should resolve like the unprefixed property. The alignment in Effect should position items as specified.	sm tall sm
3	<code>-webkit-align-self</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>`align-self`</code> . Should resolve like the unprefixed property. The alignment in Effect should position items as specified.	AselfC
4	<code>-webkit-border-bottom-left-radius</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>`border-bottom-left-radius`</code> . Should resolve like the unprefixed property. The 12px rounding in Effect should make the box's corners appear curved.	BL
5	<code>-webkit-border-bottom-right-radius</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>`border-bottom-right-radius`</code> . Should resolve like the unprefixed property. The 12px rounding in Effect should make the box's corners appear curved.	BR
6	<code>-webkit-border-radius</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>`border-radius`</code> . Should resolve like the unprefixed property. The 12px rounding in Effect should make the box's corners appear curved.	round
7	<code>-webkit-border-top-left-radius</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>`border-top-left-radius`</code> . Should resolve like the unprefixed property. The 12px rounding in Effect should make the box's corners appear curved.	TL
8	<code>-webkit-border-top-right-radius</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>`border-top-right-radius`</code> . Should resolve like the unprefixed property. The 12px rounding in Effect should make the box's corners appear curved.	TR
9	<code>-webkit-box-align</code> longhand · (ungrouped)	WebKit legacy alias. Must behave like the normalized unprefixed property. The alignment in Effect should position items as specified.	sm mid
10	<code>-webkit-box-flex</code> longhand · (ungrouped)	WebKit legacy alias. Must behave like the normalized unprefixed property. The flex layout in Effect should arrange items as specified.	flexfix
11	<code>-webkit-box-ordinal-group</code> longhand · (ungrouped)	WebKit legacy alias. Must behave like the normalized unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	1st2nd
12	<code>-webkit-box-orient</code> longhand · (ungrouped)	WebKit legacy alias. Must behave like the normalized unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	A B

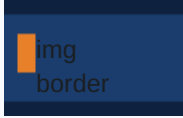

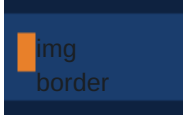

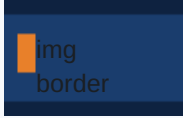

#	Property	What it should do	Effect (live)
13	<code>-webkit-box-pack</code> longhand · (ungrouped)	WebKit legacy alias. Must behave like the normalized unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	
14	<code>-webkit-box-shadow</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `box-shadow`. Should resolve like the unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	
15	<code>-webkit-box-sizing</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `box-sizing`. Should resolve like the unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	
16	<code>-webkit-filter</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `filter`. Should resolve like the unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	
17	<code>-webkit-flex</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `flex`. Should resolve like the unprefixed property. The flex layout in Effect should arrange items as specified.	
18	<code>-webkit-flex-basis</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `flex-basis`. Should resolve like the unprefixed property. The flex layout in Effect should arrange items as specified.	
19	<code>-webkit-flex-direction</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `flex-direction`. Should resolve like the unprefixed property. The flex layout in Effect should arrange items as specified.	
20	<code>-webkit-flex-flow</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `flex-flow`. Should resolve like the unprefixed property. The flex layout in Effect should arrange items as specified.	
21	<code>-webkit-flex-grow</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `flex-grow`. Should resolve like the unprefixed property. The flex layout in Effect should arrange items as specified.	
22	<code>-webkit-flex-shrink</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `flex-shrink`. Should resolve like the unprefixed property. The flex layout in Effect should arrange items as specified.	
23	<code>-webkit-flex-wrap</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `flex-wrap`. Should resolve like the unprefixed property. The flex layout in Effect should arrange items as specified.	
24	<code>-webkit-justify-content</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `justify-content`. Should resolve like the unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	
25	<code>-webkit-order</code> legacy-alias · (ungrouped)	Vendor/legacy alias of `order`. Should resolve like the unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	
26	<code>-webkit-text-fill-color</code> longhand · WebKit Extensions	WebKit legacy alias. Must behave like the normalized unprefixed property. The text/border in Effect should appear in the specified color.	colored text

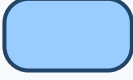

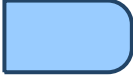

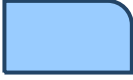

#	Property	What it should do	Effect (live)
27	<code>-webkit-transform</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>transform</code> . Should resolve like the unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	T
28	<code>-webkit-transform-origin</code> legacy-alias · (ungrouped)	Vendor/legacy alias of <code>transform-origin</code> . Should resolve like the unprefixed property. The Effect cell shows the property applied; the rendered box should reflect the specified value.	T
29	<code>accent-color</code> longhand · CSS Basic User Interface	Implemented <code>accent-color</code> (CSS Basic User Interface). Effect cell shows the property applied. The accent color should tint form controls; Effect shows a box with <code>accent-color</code> applied.	accent-color applied
30	<code>align-content</code> longhand · CSS Box Alignment	Grid/alignment control. Tracks or item placement should change in the Effect cell. The alignment in Effect should position items as specified.	1 2 3
31	<code>align-items</code> longhand · CSS Box Alignment	Aligns flex/grid items on the cross/block axis. The alignment in Effect should position items as specified.	1 2 3
32	<code>align-self</code> longhand · CSS Box Alignment	Grid/alignment control. Tracks or item placement should change in the Effect cell. The alignment in Effect should position items as specified.	1 2 3
33	<code>background</code> shorthand · CSS Backgrounds and Borders	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
34	<code>background-attachment</code> longhand · CSS Backgrounds and Borders	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
35	<code>background-blend-mode</code> longhand · Compositing and Blending	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
36	<code>background-clip</code> longhand · CSS Backgrounds and Borders	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
37	<code>background-color</code> longhand · CSS Backgrounds and Borders	Paints the box background behind content. The background in Effect should show the specified color/image/position.	
38	<code>background-image</code> longhand · CSS Backgrounds and Borders	Layers an image (or gradient) behind the content. The background in Effect should show the specified color/image/position.	
39	<code>background-origin</code> longhand · CSS Backgrounds and Borders	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
40	<code>background-position</code> shorthand · CSS Backgrounds and Borders	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	

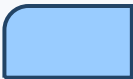

#	Property	What it should do	Effect (live)
41	background-position-block longhand · (ungrouped)	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
42	background-position-inline longhand · (ungrouped)	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
43	background-position-x longhand · CSS Backgrounds and Borders	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
44	background-position-y longhand · CSS Backgrounds and Borders	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
45	background-repeat longhand · CSS Backgrounds and Borders	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
46	background-repeat-block longhand · (ungrouped)	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
47	background-repeat-inline longhand · (ungrouped)	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
48	background-repeat-x longhand · (ungrouped)	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
49	background-repeat-y longhand · (ungrouped)	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
50	background-size longhand · CSS Backgrounds and Borders	Background longhand/shorthand affecting color, image, repeat, position, size, clip, or origin. The background in Effect should show the specified color/image/position.	
51	block-size longhand · CSS Logical Properties and Values	Sizing constraint on the content/border box (physical or logical). The sizing in Effect should constrain the box as specified.	size
52	bookmark-label longhand · (ungrouped)	Implemented `bookmark-label` ((ungrouped)). Effect cell shows the property applied. The Effect cell shows the property applied; the rendered box should reflect the specified value.	bookmark-label applied
53	bookmark-level longhand · (ungrouped)	Implemented `bookmark-level` ((ungrouped)). Effect cell shows the property applied. The Effect cell shows the property applied; the rendered box should reflect the specified value.	bookmark-level applied

#	Property	What it should do	Effect (live)
54	bookmark-state longhand · (ungrouped)	Implemented `bookmark-state` ((ungrouped)). Effect cell shows the property applied. The Effect cell shows the property applied; the rendered box should reflect the specified value.	bookmark-state applied
55	border shorthand · CSS Backgrounds and Borders	Shorthand for border-width/style/color on all sides. The border in Effect should appear with the specified width/style/color.	box
56	border-block shorthand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	box
57	border-block-color shorthand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear in the specified color (#c40).	box
58	border-block-end shorthand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	box
59	border-block-end-color longhand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear in the specified color (#c40).	box
60	border-block-end-radius shorthand · (ungrouped)	Controls corner rounding on the indicated corner(s) or axis. The 12px rounding in Effect should make the box's corners appear curved.	
61	border-block-end-style longhand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	box
62	border-block-end-width longhand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	box
63	border-block-start shorthand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	box
64	border-block-start-color longhand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear in the specified color (#c40).	box
65	border-block-start-radius shorthand · (ungrouped)	Controls corner rounding on the indicated corner(s) or axis. The 12px rounding in Effect should make the box's corners appear curved.	
66	border-block-start-style longhand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	box
67	border-block-start-width longhand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	box
68	border-block-style shorthand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	box

#	Property	What it should do	Effect (live)
69	border-block-width shorthand · CSS Logical Properties and Values	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	 box
70	border-bottom shorthand · CSS Backgrounds and Borders	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	 box
71	border-bottom-color longhand · CSS Backgrounds and Borders	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear in the specified color (#c40).	box
72	border-bottom-left-radius longhand · CSS Backgrounds and Borders	Controls corner rounding on the indicated corner(s) or axis. The 12px rounding in Effect should make the box's corners appear curved.	
73	border-bottom-radius shorthand · (ungrouped)	Controls corner rounding on the indicated corner(s) or axis. The 12px rounding in Effect should make the box's corners appear curved.	
74	border-bottom-right-radius longhand · CSS Backgrounds and Borders	Controls corner rounding on the indicated corner(s) or axis. The 12px rounding in Effect should make the box's corners appear curved.	
75	border-bottom-style longhand · CSS Backgrounds and Borders	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	box
76	border-bottom-width longhand · CSS Backgrounds and Borders	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear with the specified width/style/color.	 box
77	border-collapse longhand · CSS Table	separate vs collapse table border model. The border in Effect should appear with the specified width/style/color.	box
78	border-color shorthand · CSS Backgrounds and Borders	Border longhand/shorthand: width, style, and/or color on the indicated side(s). The border in Effect should appear in the specified color (#c40).	box
79	border-end-end-radius longhand · CSS Logical Properties and Values	Controls corner rounding on the indicated corner(s) or axis. The 12px rounding in Effect should make the box's corners appear curved.	
80	border-end-start-radius longhand · CSS Logical Properties and Values	Controls corner rounding on the indicated corner(s) or axis. The 12px rounding in Effect should make the box's corners appear curved.	
81	border-image shorthand · CSS Backgrounds and Borders	Border-image longhand/shorthand: paints an image as the border. The border in Effect should appear with the specified width/style/color.	 img border
82	border-image-outset longhand · CSS Backgrounds and Borders	Border-image longhand/shorthand: paints an image as the border. The border in Effect should appear with the specified width/style/color.	 img border
83	border-image-repeat longhand · CSS Backgrounds and Borders	Border-image longhand/shorthand: paints an image as the border. The border in Effect should appear with the specified width/style/color.	 img border

#	Property	What it should do	Effect (live)
84	border-image-slice longhand · CSS Backgrounds and Borders	Border-image longhand/shorthand: paints an image as the border. The border in Effect should appear with the specified width/style/color.	
85	border-image-source longhand · CSS Backgrounds and Borders	Border-image longhand/shorthand: paints an image as the border. The border in Effect should appear with the specified width/style/color.	
86	border-image-width longhand · CSS Backgrounds and Borders	Border-image longhand/shorthand: paints an image as the border. The border in Effect should appear with the specified width/style/color.
