

Filler block 22. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-22.

Filler block 23. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-23.

Filler block 24. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-24.

Filler block 25. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-25.

Filler block 26. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-26.

Filler block 27. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-27.

Filler block 28. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-28.

Filler block 29. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-29.

Filler block 30. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-30.

Filler block 31. Dense prose fills vertical space so short paragraphs and headings land near page boundaries where phase-18 heuristics operate. Stable wording keeps golden extraction deterministic. Marker ORPHAN-FILL-31.

Filler block 32. Approaching the natural page-break zone. Marker ORPHAN-FILL-32.

Short straddler candidate near the first page bottom. **ORPHAN-SHORT-STRADDLE** Two or three lines only so orphansWidows may lift the whole block.

Keep-with-next heading ORPHAN-HEADING-KEEP

Body immediately after the heading must not leave the heading stranded alone at the bottom.

ORPHAN-HEADING-BODY

Continuation page

Forced continuation ensures a stable ≥ 2 page envelope. **ORPHAN-PAGE2-SHORT**

Trailing page-two prose. Marker ORPHAN-TRAIL-01.

Trailing page-two prose. Marker ORPHAN-TRAIL-02.

Trailing page-two prose. Marker ORPHAN-TRAIL-03.

Trailing page-two prose. Marker ORPHAN-TRAIL-04.

Trailing page-two prose. Marker ORPHAN-TRAIL-05.
