

Release Notes - Widget Suite 2.4

Published 2024-08-15 · Build 2.4.0-184

Important: this release changes the on-disk format of configuration files. Backup existing configurations before upgrading.

New features

Area	What changed	Docs
Dashboard	New capacity view with trend lines	WK-1101
API	Rate limit headers exposed on every response	WK-1102
CLI	Batch export for up to 10,000 records	WK-1103

Bug fixes

Fixed a race in the scheduler that could stall nightly reports on multi-core hosts (WK-1094). Fixed an off-by-one in the pager that hid the last row of long lists (WK-1098).

All styling for this document comes from the linked stylesheet style-05.css - there is no inline style block.
