

WEEKLY DISPATCH / DISTRICT 04

# Keeping the last mile visible.

A calm, practical readout for the teams moving essential supplies through the north corridor.

Prepared for the morning stand-up · Revision 1.2 · Internal circulation

|                                              |                                           |                                            |

| <div>Late return scans</div>   | Action needed |

This brief is designed to be read in under five minutes: the next two pages hold the route detail and the actions for the week ahead.

# Where the week is moving

| ROUTE                                | STOPS | ON TIME | NEXT DEPARTURE | STATUS    |
|--------------------------------------|-------|---------|----------------|-----------|
| <b>Ridge market loop</b><br>NL-04A   | 68    | 92%     | 06:40          | ON TRACK  |
| <b>Canal-side kitchens</b><br>NL-04B | 54    | 81%     | 07:05          | WATCH     |
| <b>Orchard school run</b><br>NL-04C  | 73    | 88%     | 07:20          | ON TRACK  |
| <b>Old station relay</b><br>NL-04D   | 41    | 67%     | 08:10          | INTERVENE |
| <b>West allotment spur</b><br>NL-04E | 82    | 86%     | 08:35          | ON TRACK  |

### READOUT

- Early loading is protecting the first two departures.
- Canal-side delays cluster around the 10:00 handoff.
- Old station needs a second scan point this week.

### MEASURE TWICE

Use the return scan as the source of truth for completed stops. Driver notes remain useful context, but should not replace the scan.

**Decision for Monday:** keep the Old station relay on the standard route, but assign a floating coordinator until the second scan point is live.

# Small actions, clear owners

- 1

**INSTALL THE SECOND SCAN POINT**

Place a paired scanner at Old station before the Tuesday departure and test it against the dispatch ledger.

TODAY
- 2

**SHIFT THE CANAL-SIDE HANDOFF**

Move the kitchen handoff 20 minutes earlier while the bridge access window remains unpredictable.

TUESDAY
- 3

**CLOSE THE RETURN-SCAN GAP**

Review every missing return scan at the afternoon stand-up and record one reason code per exception.

DAILY
- 4

**PUBLISH THE NEXT ROUTE SHEET**

Release the revised sheet with the bridge note, the new scan point, and the named floating coordinator.

FRIDAY

NEXT REVIEW WINDOW

**MONDAY, 17 AUGUST · 08:15**

Bring route exceptions, scanner uptime, and the first two days of Old station return scans.
