

Product Brief - Widget 2.0

Prepared by Product Management · Classification: internal

Executive summary Widget 2.0 replaces the 1.x line with a fully modular architecture. The core module is 40 % lighter, the interface module is swappable in the field, and the service interval doubled to 24 months. Pricing for the entry configuration is unchanged. The premium configuration adds the telemetry module and a five-year warranty.	Key numbers Weight: 12.4 kg (was 20.1 kg) Service interval: 24 months MTBF: 18,000 h Warranty: 2 years standard All figures validated by the engineering review of 2024-08-01, revision C.
--	---

The two-column body above is a table with two fixed-width cells; the engine renders floats as in-flow blocks, so tables are the supported way to build multi-column documents.
