

Next 72 CSS audit

72 target properties · font-family "Liberation Sans" · local images · Chrome support from MDN BCD

NEXT-72-PROPS

Each row names a v0.2.7 target property (currently unsupported in gowk), explains the expected effect in plain words, and applies that property in the Effect cell. The property meta line is kind · group · Chrome yes/no (MDN browser-compat-data). If Chrome says no, the Effect cell will often look unchanged in Chrome; that is expected. Generate with --font-path testdata/fonts/implemented-audit.

#	Property	What it should do	Effect (live)
1	font-feature-settings longhand · CSS Fonts · Chrome yes (since 48)	With `font-feature-settings: 'smcp' 1` OpenType small-caps features should engage when available.	Ag fi 0123
